Flywheels

High-quality flywheels cost-efficiently

Kilkanen Oy has more than 25 years of knowhow in the making of flywheels. Thanks to our robust experience and competence we are able to deliver flywheels quickly and cost-efficiently without compromising the high quality. Our flexibility ensures fast, comprehensive deliveries which include all the components needed.

We have also delivered demanding high-quality flywheels especially for ship and power plant motors.

We make flywheels up to the diameter of 2,000 millimetres. Our production also covers the gearing and stamping of flywheels.
